

## My wishes for 2015

« **CONNECTED** »

College students of the "Festival of Words" elected this word as the most representative term of the coming year.

Etymologically, it means "together in a knot."

Which means being in the same time, in the same present.

The youth unconscious expresses the sense of **2015**.

**2** and **15** separated by a **0**.

**2**: is open up, change his look.

**15** (**1** and **5**): (**1**) is self-recognition

and (**5**) is experimentation without object.

(**1** + **5**) = **6**: is love, benevolence as fact.

**0** between **2** and **15** nominates this change of plan, the passage through emptiness which only awareness has access.

**8** is the theosophical sum of the four numbers of the year: **Presence**

This year, **2015** invites us to change our point of view about Love.

Consciously realize that Love is at first to respect oneself

in the experiment of life without shyness.

There is no energy to lose in research of the **present moment**:

**Just live it!**

I It is our responsibility to develop this new vision.

These are the wishes that I make for each of us.

With all my heart.

Jean-Philippe Brébion
